

Good morning,

Currently devoted to their own business, which has run since 2004. At the beginning of its existence dealt with WAN, LAN, WLAN, computer hardware, computer configuration and submission. Currently, more focus on web applications and programs, websites, web portals, e-commerce. Possess and administer 2 servers are on Linux. I program in languages such as PHP, SQL, Firebird, MySQL, PostgreSQL, C #, ASP. Net, Smarty, XML, XSL, XPATH, JavaScript, XHTML, HTML, CSS, recently I got interested in JAVA. Using frameworks such as Zend, TYPO3, Joomla, WordPress, Magento, PrestaShop, jQuery / UI, Kendo, Ext JS. Very often I develop and modernize existing frameworks, written individually for the customer.

By the end of May 2012. I worked as a "team leader / programmer" at MediaVerse, a year recruiting a team of programmers, controlling the work done by them, guided by development projects. I created the technical specifications. Was programming in languages such as PHP 5.3, SQL, MySQL 5.1, Smarty 3.1, HTML 5, CSS 2/3, jQuery/UI.

By the end of August 2011. I worked as a "Product Manager / Senior Developer" in the company COMES almost four years. I worked there every day programming languages such as PHP, XML, SQL, Firebird, MySQL, Smarty, XHTML, HTML, CSS, jQuery / UI, JavaScript. Manage working time two programmers, graphics and positioner. Supervised, planned, and was creating loyalty programs and promotions for the company. I created for web banners corporate advertising campaigns.

By the end of September 2007. I worked as a "Web Application Developer" at ANIXE over 2 years programming in these languages, and also in C #, ASP. Net, XSL, XPATH. I dealt with there web design for travel companies. Proprietary game engine building company to book tickets online and customize it to your needs.

In 2001 I finished the study of information technology thesis. I wrote a program for the school, "Journal lesson" in C++.

In 2006, I defended the title of engineer, writing works in web design in PHP, MySQL with additives Java JavaScript. In 2012 I defended my master's thesis at the University of Computer Science and Economics Econometrics.
